Skills

Tools and Technologies

(Intermediate to Higher)

- Javascript Ecosystem

JavaScript | Typescript | React |
React Native | Node | Express | JQuery
Jest | ESLint | Vite | Yarn

- Databases

SQL | MongoDB | Postgres

- Web

HTML | CSS | SASS | Web APIs

- Miscellaneous

GIT | Linux | Docker | Selenium |
Shell scraping

Touched with

(Beginner)

GoLang | Python | C#.net core | Java |
C/C++ | PHP/Laravel

Concept and system

{Beginner to Intermediate}

- Software Engineering
- DB | OS | Networking
- DevOps concepts
- Data structure | Algorithms
- Testing (ISTQB Foundation)
- Solid | Design principles | DP
- SEO | UX
- Scraping | Crawling
- Automation

Summary

- Junior Software **Engineer**, I am **planning** to be a **true** engineer and to be able to **raise the bar** in any team
- I have **T-Shape** Knowledge of software development
- **Flexible**, adaptive, **responsible**, coachable, **proactive**, and **honest** so I think that I fit for most **cultures** and environments
- I have **validation first**, and a **positive attitude**
- Naturally acceptable at organizing, **analysis**, and planning

Experience

Full stack web developer at CORELIA

Dec 2021 - Now

Summary :

Working Remotly as Full Stack Web developer for **Corelia.ai** , french based company that provide IT Services and Consulting

Projects :

1. I helped the cyber security team to accelerate the data gathering phase by 30% percentage using a tool that I developed it depend on the scraping for some websites like LinkedIn and the crawling for the main website and its subdomains and parsing of returned raw data and the integration with some tools like security trails
2. I Participated in the development of some endpoints like extract text from French receipts using tesseract OCR and Designed an algorithm to get the product lines from the text and some other endpoints and developed a web app to accelerate the dev phase and to validated some suggested solutions and developed a mobile app for the main idea using react native
3. Participated in stress test

Main Tools:

JS | TS | Express | Dot Net | React | React Native | selenium | MariaDB | MongoDB | GIT | Docker | Mocka

Projects (Selected list)

AFokado (GP)

Sep 2019

Management system for the law firms and the law students (Demo)

Falve (MVP)

Aug 2021

System for bootstrapping and sharing the resources among the startups

ELStore

June 2021

B2C ecommerce system

Academic History

Bachelor's degree in **computer science** And AI
Helwan University

2016 - 2020
GPA : 3.23 | Very Good
